# **Interim Management Report of Fund Performance as at June 30, 2025**

## **RGP Emerging Markets Fund**

### **Results of Operations**

The Fund's Class "A" returned of 16.5%, after deducting fees and expenses, for the period from January 1<sup>st</sup>, 2025, to June 30, 2025. The net returns of the other classes of the Fund are similar to those of Class "A", except for differences attributable to the fee structures specific to these classes. For the performance of the various classes and the Fund's long-term performance, please refer to the "Past Performance" section of this report.

The Fund's benchmark index returned 9.4% for the period. It is composed entirely of the MSCI Emerging Markets Index in Canadian dollars. As a result, the Fund outperformed its benchmark index. Unlike the indices, the Fund's performance is calculated after deduction of fees and expenses. In addition to these fees, other factors also influenced the Fund's performance.

The Fund weathered the periods of high volatility earlier in the year better than global equities in general. Higher returns and a more favorable macroeconomic environment attracted many investors to emerging markets. During the period, the manager did not make any significant changes to the Fund's sector and geographic allocation strategies. The Fund maintained its predominant allocations to the financial, utilities, and industrial sectors. Its sector allocations differ significantly from those of the index.

The manager's stock selection contributed significantly to the Fund's outperformance relative to its benchmark index. Holdings in the utilities, industrial, and financial sectors stood out. More specifically, the Fund benefited from the significant increase in value of Brazilian water sanitation and electrification companies, such as Companhia de Saneamento do Paraná and Companhia Paranaense de Energia.

The Fund's net asset value increased by \$12.3 million during the period, ending at \$19.6 million as of June 30, 2025. This change is partly attributable to positive investment returns, but most of this increase is explained by net positive inflows from unitholders.

### **Recent Developments**

Geopolitical and economic risks created significant uncertainty during the period, but markets continued to show greater resilience than expected under the circumstances. The new U.S. administration's intentions to increase trade tariffs caused a sharp market pullback mid-term, although concerns later subsided.

The introduction of tariffs by the U.S. government, internal political divisions, and the lack of clarity in communications from the White House appear to have prompted investors to seek opportunities outside the United States, which benefited the Fund. Emerging markets enjoyed a particularly favorable environment, notably due to the marked decline of the U.S. dollar, which reduced the cost of foreign currency debt and made local assets relatively more attractive than they had been just a few months earlier. Corporate valuations in emerging markets remain competitive, and domestic economic growth continues to be robust in key countries such as China, India, and Brazil. Globally, governments generally continue to provide strong support for infrastructure investments. Structural trends such as urbanization, water scarcity, and the growing demand for sustainable infrastructure create a favorable environment for the Fund's investments. However, it remains impossible to predict future events and their impact on the markets with certainty.

On March 20, 2025, Mr. Gilles Lemieux and Mr. Pierre Rousseau were appointed as Chair and Member of the Independent Review Committee, respectively, following the end of Mr. Michel Desjardins' mandate.

## Related Party Transactions

### Manager, Trustee and Portfolio Advisor

R.E.G.A.R. Investment Management Inc. is the Manager, Trustee and Portfolio Advisor of the Fund. The Fund pays management fees to the Manager and Portfolio Advisor in return for management and investment advisory services (see the Management Fees section below). For the period ended June 30, 2025, total management fees were \$34,179. The Fund also pays administration fees to the Manager. In return, the Manager assumes responsibility for the Fund's operating costs and expenses, apart from certain specified costs. For the period ended June 30, 2025, total administration fees were \$7,915.

The Fund paid distributors a service fee for the direct or indirect provision of services to the Fund. See the Information on Classes section for the annual expense rates for each class (as a percentage of management fees before taxes). Holders of Class F units also pay consulting fees directly to the authorized distributor. Holders of Class I units pay fees for consulting services directly to the manager. These fees are not part of the Fund's expenses.

### Other related party transactions

During the period, and pursuant to applicable securities legislation, the Fund's manager disposed, as of May 9, 2025, of all 100.318 Class A, 100.425 Class F and 14,879.134 Class I units it held. These units consist of the 100 Classes A and F, and 14,800 Class I units initially acquired on October 1<sup>st</sup>, 2024, along with additional units acquired through the reinvestment of distributions. This transaction was carried out at fair market value, in the ordinary course of the Fund's business. As of June 30, 2025, no units are held by the Fund's manager.

Furthermore, the Fund relied on the positive recommendation of the IRC regarding the removal of restrictions applicable to the Fund's initial capital investment. The IRC confirmed that the proposed solution was appropriate, and did not impose any particular restrictions. Accordingly, this approval allowed the manager to freely dispose of the units acquired as initial capital investment for the period ended June 30, 2025.

Furthermore, no other related party transactions were conducted during the period. As such, the Fund did not rely on any approval, positive recommendation, or standing instruction from the IRC with respect to any related party transaction during the period ended June 30, 2025.

<sup>1</sup> This information is derived from the Fund's audited annual financial statements for prior periods and unaudited interim financial statements for the period ended June 30, 2025. The Fund's financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board. The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of such differences, if any, can be found in the notes to the financial statements.

<sup>2</sup> For the initial period of 92 days.

<sup>3</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the accounting period.

<sup>4</sup> Distributions were paid in cash, reinvested in additional units of the Fund, or both.

<sup>5</sup> For the initial period of 92 days.

<sup>6</sup> This information is provided as at the end of each year or period shown.

<sup>7</sup> The management expense ratio is based on total expenses for the stated period (excluding distributions, commissions, other portfolio transaction costs and withholding taxes), including applicable taxes, and a portion of underlying funds' expenses (mutual funds and exchange traded funds) where applicable, and is expressed as an annualized percentage of the daily average net asset value during the period.

<sup>8</sup> The trading expense ratio represents total commissions and other portfolio transaction costs, incurred directly or indirectly by way of an underlying fund, as applicable, and is expressed as an annualized percentage of the daily average net asset value during the stated period.

A turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio at least once in the course of the year. The higher the turnover rate in a financial year, the greater the trading costs payable by the Fund in a financial year, and the greater the possibility that the unitholder of the Fund will realize taxable capital gains during the financial year. There is not necessarily a relationship between a high turnover rate and a Fund's performance.
