
INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period from January 1, 2024 to June 30, 2024

GreenWise Conservative Portfolio

This interim management report of fund performance contains financial highlights but does not contain either the interim financial statements or the complete annual financial statements of the GreenWise Conservative Portfolio (the “Fund”). You can get a copy of interim financial statements or the annual financial statements, at your request and at no cost, by calling us at 1-888-929-7337, by writing to us at 1305 Lebourgneuf Blvd, Suite 550, Quebec City, Quebec, G2K 2E4 or by visiting our website www.rgpinvestments.ca or SEDAR at www.sedarplus.ca.

You may also contact us using one of these methods to request a copy of the Fund’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Caution Regarding Forward-Looking Statements

Certain portions of this Report including, but not limited to, the sections entitled Results and Recent Developments, may contain forward-looking statements about the Fund, including its strategy, risks, performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions or that include words such as “expect”, “anticipate”, “intend”, “plan”, “believe”, “estimate” and similar forward-looking expressions or corresponding negative versions.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future actions taken by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future developments and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Forward-looking statements are not guarantees of performance. Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risk and uncertainties with respect to general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement.

Forward-looking statements are not guarantees of future performance, and actual developments and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events. The above list of important factors that may affect future results is not exhaustive. Although such statements are based on assumptions that are believed to be reasonable, there can be no assurance that actual results will not differ materially from expectations. We caution you not to rely unduly on any forward-looking statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement.

We encourage you to consider these and other factors carefully before making any investment decisions, and we strongly urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements, whether as a result of new information, future events or otherwise, prior to the release of the next management report of Fund performance.

Interim Management Report of Fund Performance as at June 30, 2024

GreenWise Conservative Portfolio

Management Discussion of Performance Investment Objective and Strategies

The investment objective of this Fund is to produce a combination of income and some long-term capital appreciation through responsible investing. The Fund invests primarily in Canadian or foreign equity securities and fixed income securities, either directly or through investments in securities of exchange-traded funds or mutual funds.

The Fund implements a responsible investment strategy that incorporates environmental, social and governance (ESG) factors into its analyzes.

The target weighting for each asset class in which the portfolio invests under normal market conditions is as follows:

- 60% of net assets in fixed-income securities with an allowable increase or decrease of 15%; and
- 40% of net assets in equity securities with an allowable increase or decrease of 15%.

At the Fund manager's discretion, the target weighting of each asset class in the Fund may be revised or adjusted in response to the economic situation and market performance. The Fund may invest up to 100% of its assets in foreign securities. The Fund does not intend to invest more than 12% of its net assets in emerging markets securities. It may also invest up to all of its assets in securities, exchange-traded funds or other mutual funds. The Fund manager has the option of choosing the securities or the underlying funds (or mutual funds), modifying their weighting in the Fund, removing an underlying fund and/or adding other funds. The Fund may hold part of its assets in liquidities or money market funds while it is looking for investment opportunities, or for the purpose of cash management, or for defensive purposes in relation to the market or for the purpose of a merger or other transaction. As a result, Fund investments may not correspond exactly to the Fund's investment objective for a temporary period.

Risk

The Fund's risk level is low to medium. The overall level of risk of investing in the Fund remains as discussed in the Simplified Prospectus and has not significantly increased or decreased as a result of operations during the period. Accordingly, the Fund also remains suitable for the investors described in the Simplified Prospectus.

Results

The Fund's "A" Class returned 1.4% after fees and expenses, for the period from January 1, 2024 to June 30, 2024. The net returns of the Fund's other classes are similar to those of class "A", with the exception of differences attributable to fee structures. For class performance and long-term Fund performance, please refer to the "Past Performance" section of this report. The portfolio's benchmark returned 6.3% for the period. The index is composed of 40% MSCI World ESG Leaders Index in Canadian currency, 42% FTSE Canada Universe Bond Index and 18% Bloomberg MSCI Global Green Bond Index hedged in Canadian currency.

Market overview:

The year 2024 got off to a flying start, with global equities returning more than 11% to Canadian investors in the very first quarter, according to the MSCI World Index. South of the border, the strength of the US economy pushed the S&P 500 index to new record highs. Japanese equities, whose performance is most often measured by the Nikkei 225 index, also hit record highs, helped undoubtedly by the yen's weakness against the US dollar. China and the major developed countries, openly engaged in a race to build and secure their microprocessors supply chains, continued their efforts in this direction. Chipmakers and equipment suppliers benefited from the situation and "stole the show" in terms of stock market performance between January and June. Growing geopolitical tensions and armed conflicts abroad did not seem to trouble investors too much. However, these tensions have helped

the rapid rise in the price of gold and perhaps even crypto-currencies. As for monetary policy, forecasters were still debating at the end of March when the US Federal Reserve would cut short-term interest rates for the first time. Some were even questioning the wisdom of such a move before the end of the year.

Global stock markets maintained their momentum in the second quarter. Expectations of a soft landing for the global economy have risen, despite the fact that both the global economy and consumers still have to negotiate with interest rates that are considered high. The technology sector has been particularly strong in the US, in the wake of the artificial intelligence craze. Optimism about the economy and corporate earnings growth was also reflected in the bond markets. Credit spreads there remained at very low levels, a sign that investors had little fear of future defaults by corporate issuers.

These results contrast with those of the Canadian stock market index, which lost ground in the second quarter. The Canadian economy seems less vigorous than that of its southern neighbor, and more affected by rising interest rates. Indeed, the Bank of Canada cut its key rate before the end of June, in response to signals of economic slowdown and progress in its fight against inflation.

The U.S., Canadian, European and Asian developed stock indices ended the first half of the year up 19.4%, 6.1% and 9.3% respectively, in Canadian dollars. Canadian and global bond groups posted returns of -0.2% and 0.5% respectively in Canadian dollars over the same period. The Canadian dollar lost -3.2% against the US dollar in the semester. Excluding the U.S. dollar, our currency has gained 1.5% against a range of other international currencies, according to the Canadian dollar effective exchange rate index.

Factors impacting performance:

The Fund underperformed its benchmark. In addition to expenses, the manager believes that several factors had a positive or negative effect on the Fund's performance. It is appropriate to evaluate the various factors by considering both the impact on the Fund's absolute returns and the impact on relative returns, i.e. in comparison with the benchmark index.

The analysis of absolute returns points to some similar findings to those presented in the previous report. U.S. ultra-large-cap companies with higher earnings growth profiles and multiples have built on their momentum of the past year, outperforming all global equity markets over the past 6 months. This performance was underpinned by US economic growth and slowing inflation rates, as well as the market's enthusiasm for artificial intelligence. The technology and communications sectors led the way. On the other hand, other positions held back the fund's absolute returns. Defensive sectors, generally less volatile and trading at lower multiples, posted the lowest returns. These included companies in the healthcare, utilities, consumer staples and real estate sectors. Other sectors covered by the fund's investments, such as materials and consumer discretionary, also underperformed. Similarly, the Canadian stock market, which is heavily weighted in natural resources, underperformed the MSCI World ESG Leaders Index. With optimism about the economy and risk premiums tightening, riskier bonds and those with short to medium maturities outperformed safer government bonds and those with longer maturities.

The factors influencing the fund's returns differ somewhat when analyzed against the benchmark. In particular, the choice of individual stocks, such as industrial companies involved in the development of power grids and the theme of climate change, stood out in relative terms. The fund also benefited from the outperformance of sub-managers managing the Canadian portion of bond investments. The tightening of credit spreads during the period, together with increased allocations to green, social and sustainable bonds, improved the fund's overall relative performance. On the other hand, our underexposure to the consumer discretionary and communications equity sectors, as well as our overexposure to utilities, were factors that detracted from the fund's relative performance. The absence of holdings in the fossil fuel sector, which outperformed the fund as a whole, also had a negative impact on performance. The portfolio's emphasis on impact themes is considered to have had a negative effect over the period. As for geographic allocation, Canadian equities were unfavorable due to our overexposure to this market compared to its lower weighting in the benchmark index, as well as their lower returns during the half-year. Finally, the fund's tactical underweighting of equities relative to its benchmark also had a negative impact on relative performance.

Impact of environmental, social and governance strategies:

To properly assess the impact that responsible investment strategies have had on the performance of the RGP Funds that incorporate and promote them, as is the case with the present fund, it is advisable to compare their contribution by considering for these assessments the performance and composition of general indices that do not follow such strategies and are not subject to the constraints that arise from them.

Negative screening (exclusion) - The manager seeks to exclude from its selection securities or investments whose activities relate to products, services or industries deemed sensitive or harmful. The exclusion of the fossil fuel, arms and tobacco sectors, which outperformed the fund as a whole, had a negative impact on the fund's performance relative to market indices that do not employ these filters.

Positive screening (Best-in-class) - Through positive filtering on companies with the best ESG risk ratings, the fund has a higher exposure to the companies that make up the MSCI World ESG Leaders index. This factor is considered to have been positive for the fund's relative performance over the period, as this index did slightly better than the MSCI World Index, which is equivalent, but without the ESG constraints.

Thematic investing - The fund invests a portion of its assets in themes or industries that are expected to benefit from positive ESG trends over the long term. For the period under review, our thematic investments tended to have a negative effect on the portfolio. However, industrial companies involved in the development of power grids, those selected in the health and wellness and water management themes contributed most to the fund's relative performance. By contrast, the renewable energies and food themes had a negative impact on the fund's relative performance.

Impact Fixed Income - The fund invests its entire bond portion in the RGP Impact Fixed Income portfolio, which implements a responsible investment strategy incorporating environmental, social and governance ("ESG") factors. Greater exposure to municipal bonds, climate-change impact securities and other securities exposed to credit risk in general contributed positively to performance, as credit spreads narrowed. The good relative performance of sub-managers with a Canadian mandate was also a positive factor. To a lesser extent, the positive correlation observed between credit quality and good ESG ratings can lead to securities selected in this way having a slightly higher overall credit quality than others. With credit premiums having tightened over the period, the slightly more defensive positioning of this portion was detrimental to the portfolio in the short term, according to our assessment.

Changes to the portfolio:

During the period, the Fund made changes to its benchmark index. The new benchmark is composed of 40% MSCI World ESG Leaders Index in Canadian currency, 42% FTSE Canada Universe Bond Index and 18% Bloomberg MSCI Global Green Bond Index hedged in Canadian currency.

The manager has maintained a lower-than-normal asset allocation to equity investments, while remaining within the permitted limits. These adjustments are part of overall risk management and are temporary. Otherwise, the manager has not made any other significant changes to the portfolio or made any other changes that are outside the normal scope of the Fund's strategies. The manager carries out transactions to take advantage of market movements and adjust allocations between asset classes, economic sectors, industries and target themes.

Recent Developments

There are several risks that investors should generally take into account. When they materialize, these risks can have a negative impact on portfolio and Fund returns. From our point of view, the risks that seem to have recently increased more than others concern politics, economic activity and stock markets. Tensions in US politics, the lack of visibility on the outcome of their presidential elections, and uncertainties over the fiscal, budgetary, regulatory and trade measures that will follow, are making decision-making more complex for business leaders. All this is likely to slow down the deployment of capital and investment projects, possibly slowing down the economy. Combined with the still-high level of short-term interest rates and more expensive financial multiples than in the last six months, particularly in the USA, these risks expose investors in equity markets, corporate bonds and credit-quality strategies to temporary downward corrections of an amplitude that could be underestimated. Economic growth has remained positive in recent months, but a slowdown cannot be ruled out. Future events and their influence on the markets remain uncertain at all times.

Related Party Transactions

R.E.G.A.R. Investment Management Inc. is the Manager, Trustee and Portfolio Advisor of the Fund.

The Fund pays management fees to the Manager and Portfolio Advisor in return for management and investment advisory services (see the Management Fees section below). For the period ended June 30, 2024, total management fees were \$179,050. The Fund also pays administration fees to the Manager. In return, the Manager assumes responsibility for the Fund's operating costs and expenses, apart from certain specified costs. For the period ended June 30, 2024, total administration fees were \$53,030.

The Fund paid distributors a service fee for the direct or indirect provision of services to the Fund. See the Information on Classes section for the annual expense rates for each class (as a percentage of average net assets). Holders of Class F units also pay consulting fees directly to the authorized distributor. Holders of Class P units pay fees for consulting services directly to the manager. These fees are not part of the Fund's expenses.

Other Related Party Transactions

Pursuant to applicable securities legislation, the Fund rely on standing instructions from the Fund Independent Review Committee with respect to inter-fund trading, where securities may be purchased from, or sold to, another Fund managed by the Manager. Those transactions are made at market prices and are intended to reduce the transaction costs and commissions incurred by the Fund.

For the period ended June 30, 2024, the Fund did not enter into inter-fund security transactions.

Holdings of Class I units of the RGP Impact Fixed Income Portfolio

The Fund holds Class I units of the RGP Impact Fixed Income Portfolio, another fund manager by the Manager. As at June 30, 2024, the Fund held 3,014,384 Class I units, representing 25.99% of outstanding units of the class.

Financial Highlights

The following tables show the key financial information about the Fund and are intended to help you understand the Fund's financial performance over the period ended June 30, 2024, and the past four years.

NET ASSETS PER UNIT¹ Class A (RGP600) - (\$ per unit)	June 30 2024	December 31, 2023	December 31, 2022	December 31, 2021	December 31, 2020 ²

Net asset value per unit	\$9.93	\$9.79	\$9.23	\$10.77	\$10.69

¹ This information is derived from the Fund's audited annual financial statements for prior periods and unaudited interim financial statements for the period ended June 30, 2024. The Fund's financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of such differences, if any, can be found in the notes to the financial statements.

² Initial financial year of 99 days.

³ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the accounting period.

⁴ Distributions were paid in cash, reinvested in additional units of the Fund, or both.

⁵ Initial financial year of 99 days.

⁶ This information is provided as at the end of each year or period shown.

⁷ The management expense ratio is based on total expenses for the stated period (excluding distributions, commissions, other portfolio transaction costs and withholding taxes), including applicable taxes, and a portion of underlying funds' expenses (mutual funds and exchange traded funds) where applicable, and is expressed as an annualized percentage of the daily average net asset value during the period.

⁸ The trading expense ratio represents total commissions and other portfolio transaction costs, incurred directly or indirectly by way of an underlying fund, as applicable, and is expressed as an annualized percentage of the daily average net asset value during the stated period.

⁹ The turnover rate of the securities held in a Fund indicates how actively the Fund's portfolio manager manages the Fund's investments. A turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio at least once in the course of the period. The higher the turnover rate in a financial period, the greater the trading costs payable by the Fund in a financial period, and the greater the possibility that the unitholder of the Fund will realize taxable capital gains during the financial period. There is not necessarily a relationship between a high turnover rate and a Fund's performance.

There is not necessarily a relationship between a high turnover rate and a Fund's performance.

Management Fees

The Fund pays management fees to R.E.G.A.R. Investment Management Inc. The management fee paid per class is calculated as a percentage of the net asset value of the class as of the close of business on each business day (see “Information on Classes” below for management fees paid by each Class, as well as the breakdown of the services received in return, as a percentage of management fees). The management fees are used in part to pay costs incurred for investment advice and for investment management services, as well as for services related to distribution, including the cost of financial planning services, advisor commissions and bonuses, costs related to marketing and other promotional activities and Fund training sessions.

Information on Classes (as at June 30, 2024)

Classes ²⁸	Purchase options ²⁹	Management fees (before applicable taxes)	Distribution services	Investment advice and management services
Class A	Initial sales charge	1.7%	58.8%	41.2%
Class F	No sales charge	0.7%	-	100%
Class P	No sales charge	N/A	N/A	N/A

²⁸ The Fund does not pay any management fees for Class P. Investors pay fees for consulting services directly to the manager.

²⁹ Other fees may apply. Please consult the Fund’s Simplified Prospectus for further information.

Past Performance

The performance information shown below assumes that all distributions made by the Fund in periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following bar charts show the Fund's annual performance for each of the years or period shown, and illustrate how the Fund's performance changed from year to year or period to period. Expressed as a percentage, these results show how much an investment's performance has increased or decreased between the first and last day of each year or period.

* Returns for the period from September 24, 2020 to December 31, 2020.

GreenWise Conservative Portfolio

Portfolio Summary as at June 30, 2024

The Fund's portfolio securities at the end of the period and the major asset classes in which the Fund has invested are indicated below. The Fund held no short positions at the end of the period. This Summary of Investment Portfolio may change due to ongoing portfolio transactions. The Fund's Summary of Investment Portfolio will be updated as at the end of the next quarter. Please see the cover page for information about how to obtain the most up-to-date data.
