

INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE

For the period from January 1, 2024, to June 30, 2024

RGP Global Sector Class

This interim management report of fund performance contains financial highlights but does not contain either the interim financial statements or the complete annual financial statements of the RGP Global Sector Class (the "Fund"). You can get a copy of interim financial statements or the annual financial statements, at your request and at no cost, by calling us at 1-888-929-7337, by writing to us at 1305 Lebourgneuf Blvd, Suite 550, Quebec City, Quebec, G2K 2E4 or by visiting our website www.rgpinvestments.ca or SEDAR at www.sedarplus.ca.

You may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Caution Regarding Forward-Looking Statements

Certain portions of this Report including, but not limited to, the sections entitled Results and Recent Developments, may contain forward-looking statements about the Fund, including its strategy, risks, performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions or that include words such as “expect”, “anticipate”, “intend”, “plan”, “believe”, “estimate” and similar forward-looking expressions or corresponding negative versions.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future actions taken by the Fund is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future developments and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risk and uncertainties with respect to general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement.

Forward-looking statements are not guarantees of future performance, and actual developments and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings and catastrophic events. The above list of important factors that may affect future results is not exhaustive. Although such statements are based on assumptions that are believed to be reasonable, there can be no assurance that actual results will not differ materially from expectations. We caution you not to rely unduly on any forward-looking statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement.

We encourage you to consider these and other factors carefully before making any investment decisions, and we strongly urge you to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements, whether as a result of new information, future events or otherwise, prior to the release of the next management report of Fund performance.

Interim Management Report of Fund Performance as at June 30, 2024

RGP Global Sector Class

Management Discussion of Performance Investment Objective and Strategies

- The Fund's objective is to provide long-term growth by investing mostly in global equity securities, either directly or through investments in securities of exchange-traded funds or mutual funds. The Fund uses strategic asset allocation to invest most of its assets in global equities.
- Up to 100% of the Fund's assets may be invested in global equity securities, exchange-traded funds or other mutual funds.
- The Funds identifies industries or sectors with favourable long-term trends, high growth potential, near term market opportunities, or attractive valuations. The manager invests, either directly or indirectly, in companies he considers best exposed to these factors.
- The Fund manages the overall portfolio diversification and risk exposures by controlling its geographical and sector allocation, financial ratios and sensitivity to market volatility.
- The Fund intends to hold less than 10% of its assets into fixed income, cash and cash equivalent, either directly or indirectly through exchange-traded funds, money market mutual funds or cash instruments for operational purposes.

Risk

The Fund's risk level is medium. The overall level of risk of investing in the Fund remains as discussed in the Simplified Prospectus and has not significantly increased or decreased as a result of operations during the period. Accordingly, the Fund also remains suitable for the investors described in the Simplified Prospectus.

Results

The Fund's "A" class returned 9.3% after fees and expenses, for the period from January 1, 2024, to June 30, 2024. The net returns of the Fund's other series are similar to those of Series "A", with the exception of differences attributable to fee structures. For series performance and long-term Fund performance, please refer to the "Past Performance" section of this report. The portfolio's benchmark returned 16.0% for the reporting period. The index is composed of 100% of the MSCI World Index in Canadian dollars, net of fees.

Market overview:

The year 2024 got off to a flying start, with global equities returning more than 11% to Canadian investors in the very first quarter, according to the MSCI World Index. South of the border, the strength of the US economy pushed the S&P 500 index to new record highs. Japanese equities, whose performance is most often measured by the Nikkei 225 index, also hit record highs, helped undoubtedly by the yen's weakness against the US dollar. China and the major developed countries, openly engaged in a race to build and secure their microprocessors supply chains, continued their efforts in this direction. Chipmakers and equipment suppliers benefited from the situation and "stole the show" in terms of stock market performance between January and June. Growing geopolitical tensions and armed conflicts abroad did not seem to trouble investors too much. However, these tensions have helped the rapid rise in the price of gold and perhaps even crypto-currencies. As for monetary policy, forecasters were still debating at the end of March when the US Federal Reserve would cut short-term interest rates for the first time. Some were even questioning the wisdom of such a move before the end of the year.

Global stock markets maintained their momentum in the second quarter. Expectations of a soft landing for the global economy have risen, despite the fact that both the global economy and consumers still have to negotiate with interest rates that are considered high. The technology sector has been particularly strong in the US, in the wake of the artificial intelligence craze. Optimism about the

economy and corporate earnings growth was also reflected in the bond markets. Credit spreads there remained at very low levels, a sign that investors had little fear of future defaults by corporate issuers.

These results contrast with those of the Canadian stock market index, which lost ground in the second quarter. The Canadian economy seems less vigorous than that of its southern neighbor, and more affected by rising interest rates. Indeed, the Bank of Canada cut its key rate before the end of June, in response to signals of economic slowdown and progress in its fight against inflation.

The U.S., Canadian, European and Asian developed stock indices ended the first half of the year up 19.4%, 6.1% and 9.3% respectively, in Canadian dollars. Canadian and global bond groups posted returns of -0.2% and 0.5% respectively in Canadian dollars over the same period. The Canadian dollar lost -3.2% against the US dollar in the semester. Excluding the U.S. dollar, our currency has gained 1.5% against a range of other international currencies, according to the Canadian dollar effective exchange rate index.

Factors impacting performance:

The Fund underperformed its benchmark index. In addition to expenses, the manager believes that several factors had a positive or negative effect on the Fund's performance. It is appropriate to evaluate the various factors by considering both the impact on the Fund's absolute returns and the impact on relative returns, i.e. in comparison with the benchmark index.

The first half of 2024 was a continuation of last year, with the majority of stock market indices ending the period higher. Expressed in Canadian dollars, all 11 global sectors posted positive returns for the semester. As in 2023, the technology and communications sectors were the best performers over the period. Their significant weighting in the global index and respective returns of 26.5% and 24.0% drove the index higher. The resilience of the US economy and, above all, investor enthusiasm for artificial intelligence are cited as the main reasons for their outperformance. Although positive, the performance of the materials, real estate and consumer discretionary sectors was more disappointing for the period. The effects of rising interest rates over the past 18 months were increasingly felt by consumers and real estate activity. For materials, the relative weakness of the Chinese economy was partly to blame for their poorer half-year performance.

The factors influencing the Fund's returns differ somewhat when analyzed in comparison with the benchmark index. Continuing its 2023 trend, the stock market's increase was not very diffuse across sectors and geographies. Only 2 of the 11 sectors outperformed the benchmark index: technology and communications. Geographically, the U.S. stock market outperformed the global and Canadian markets, which had a negative impact on our relative performance. Overexposure to a sector or region that outperformed, and underexposure to a sector or region that underperformed, are sources of added value. For the period, our slightly higher allocation to communications was beneficial, as was our underexposure to consumer discretionary and financials. Conversely, our underweighting of technology sectors, particularly US companies, and our overexposure to materials and real estate detracted from the Fund's relative performance.

Also compared to the index, our investments in the discount chain, property & casualty insurance and biotech industries contributed positively to the Fund's returns. However, our underweighting of semiconductor companies and overexposure to IT services detracted from the Fund's performance.

Changes to the portfolio:

The manager carries out transactions to take advantage of market movements and adjust allocations between geographical regions, economic sectors, industries and target themes. For the period under review, the manager initiated positions in the energy sector. This decision was motivated by lower valuations relative to other sectors, as well as the positive role this sector can play during geopolitical tensions.

Recent Developments

There are several risks that investors should generally take into account. When they materialize, these risks can have a negative impact on portfolio and Fund's returns. From our point of view, the risks that seem to have recently increased more than others concern politics, economic activity and stock markets. Tensions in US politics, the lack of visibility on the outcome of their presidential elections, and uncertainties over the fiscal, budgetary, regulatory and trade measures that will follow, are making decision-making more complex for business leaders. All this is likely to slow down the deployment of capital and investment projects, possibly slowing down the economy. Combined with the still-high level of short-term interest rates and more expensive financial multiples than in the last six months, particularly in the USA, these risks expose investors in equity markets, corporate bonds and credit-quality strategies to temporary downward corrections of an amplitude that could be underestimated. Economic growth has remained positive in recent months, but a slowdown cannot be ruled out. Future events and their influence on the markets remain uncertain at all times.

Related Party Transactions

R.E.G.A.R. Investment Management Inc. is the Manager and Portfolio Advisor of the Fund.

The Fund pays management fees to the Manager and Portfolio Advisor in return for management and investment advisory services (see the Management Fees section below). For the period ended June 30, 2024, total management fees were \$502,463. The Fund also pays administration fees to the Manager. In return, the Manager assumes responsibility for the Fund's operating costs and expenses, apart from certain specified costs. For the period ended June 30, 2024, total administration fees were \$119,995.

The Fund paid distributors a service fee for the direct or indirect provision of services to the Fund. See the Information on Series section for the annual expense rates for each Series (as a percentage of average net assets). Holders of Series F shares also pay consulting fees directly to the authorized distributor. Holders of Series P and PT5 shares pay fees for consulting services directly to the manager. These fees are not part of the Fund's expenses. On May 10, 2024, the Series PT5 was closed.

Other Related Party Transactions

Pursuant to applicable securities legislation, the Fund rely on standing instructions from the Fund's Independent Review Committee with respect to inter-fund trading, where securities may be purchased from, or sold to, another Fund managed by the Manager. Those transactions are made at market prices and are intended to reduce the transaction costs and commissions incurred by the Fund.

For the period ended June 30, 2024, the Fund did not enter into inter-fund security transactions.

Financial Highlights

The following tables show the key financial information about the Fund and are intended to help you understand the Fund's financial performance over the period ended June 30, 2024, and the past four years.

NET ASSETS PER SHARE¹ Series A (RGP200) - (\$ per share)	June 30, 2024	December 31, 2023	December 31, 2022	December 31, 2021	December 31, 2020

Portfolio turnover rate ⁷	37.52%	100.81%	103.36%	86.02%	59.37%
Net asset value per share	\$15.15	\$13.85	\$12.96	\$16.81	\$16.02

¹ This information is derived from the Fund's audited annual financial statements for prior periods and unaudited interim financial statements for the period ended June 30, 2024. The Fund's financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of such differences, if any, can be found in the notes to the financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the accounting period.

³ Distributions were paid in cash, reinvested in additional shares of the Fund, or both.

⁴ This information is provided as at the end of each year or period shown.

⁵ The management expense ratio is based on total expenses for the stated period (excluding distributions, commissions, other portfolio transaction costs and withholding taxes), including applicable taxes, and a portion of underlying funds' expenses (mutual funds and exchange traded funds) where applicable, and is expressed as an annualized percentage of the daily average net asset value during the period.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs, incurred directly or indirectly by way of an underlying fund, as applicable, and is expressed as an annualized percentage of the daily average net asset value during the stated period.

⁷ The turnover rate of the securities held in a Fund indicates how actively the Fund's portfolio manager manages the Fund's investments. A turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio at least once in the course of the period. The higher the turnover rate in a financial period, the greater the trading costs payable by the Fund in a financial period, and the greater the possibility that the unitholder of the Fund will realize taxable capital gains during the financial period. There is not necessarily a relationship between a high turnover rate and a Fund's performance.

²⁷ The trading expense ratio represents total commissions and other portfolio transaction costs, incurred directly or indirectly by way of an underlying fund, as applicable, and is expressed as an annualized percentage of the daily average net asset value during the stated period.

²⁸ The turnover rate of the securities held in a Fund indicates how actively the Fund's portfolio manager manages the Fund's investments. A turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio at least once in the course of the period. The higher the turnover rate in a financial period, the greater the trading costs payable by the Fund in a financial period, and the greater the possibility that the unitholder of the Fund will realize taxable capital gains during the financial period. There is not necessarily a relationship between a high turnover rate and a Fund's performance.

NET ASSETS PER SHARE²⁹ Series FT5 (RGP213) - (\$ per share)	June 30, 2024	December 31, 2023	December 31, 2022	December 31, 2021	December 31, 2020

²⁹ This information is derived from the Fund's audited annual financial statements for prior periods and unaudited interim financial statements for the period ended June 30, 2024. The Fund's financial statements are prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards"). The net assets per unit presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of such differences, if any, can be found in the notes to the financial statements.

³⁰ Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the accounting period.

³¹ Distributions were paid in cash, reinvested in additional shares of the Fund, or both.

³² This information is provided as at the end of each year or period shown.

³³ The management expense ratio is based on total expenses for the stated period (excluding distributions, commissions, other portfolio transaction costs and withholding taxes), including applicable taxes, and a portion of underlying funds' expenses (mutual funds and exchange traded funds) where applicable, and is expressed as an annualized percentage of the daily average net asset value during the period.

³⁴ The trading expense ratio represents total commissions and other portfolio transaction costs, incurred directly or indirectly by way of an underlying fund, as applicable, and is expressed as an annualized percentage of the daily average net asset value during the stated period.

³⁵ The turnover rate of the securities held in a Fund indicates how actively the Fund's portfolio manager manages the Fund's investments. A turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio at least once in the course of the period. The higher the turnover rate in a financial period, the greater the trading costs payable by the Fund in a financial period, and the greater the possibility that the unitholder of the Fund will realize taxable capital gains during the financial period. There is not necessarily a relationship between a high turnover rate and a Fund's performance.

Management Fees

The Fund pays management fees to R.E.G.A.R. Investment Management Inc. The management fee paid per series is calculated as a percentage of the net asset value of the series as of the close of business on each business day (see “Information on Series” below for management fees paid by each Series, as well as the breakdown of the services received in return, as a percentage of management fees). The management fees are used in part to pay costs incurred for investment advice and for investment management services, as well as for services related to distribution, including the cost of financial planning services, advisor commissions and bonuses, costs related to marketing and other promotional activities and Fund training sessions.

Information on Series (as at June 30, 2024)

Series ³⁶	Purchase options ³⁷	Management fees (before applicable taxes)	Distribution services	Investment advice and management services
Series A	Initial sales charge	1.9%	52.6%	47.4%
Series F	No sales charge	0.9%	-	100%
Series P	No sales charge	0.0%	N/A	N/A
Series T5	Initial sales charge	1.9%	52.7%	47.3%
Series FT5	No sales charge	0.9%	-	100%

³⁶ The Fund does not pay any management fees for Series P. Investors pay fees for consulting services directly to the manager.

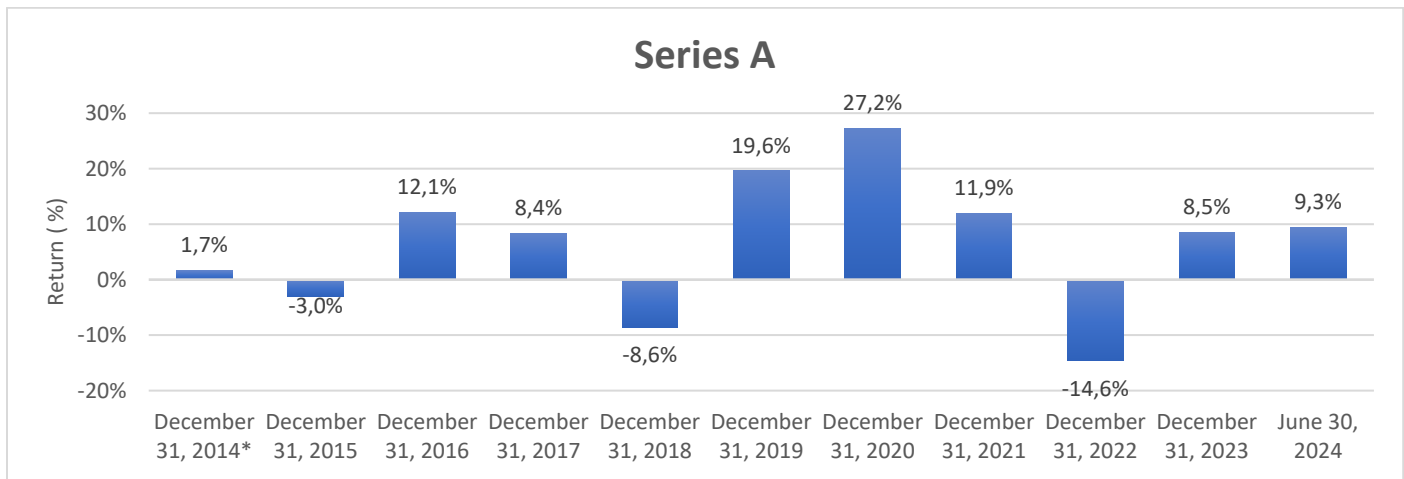

³⁷ Other fees may apply. Please consult the Fund’s Simplified Prospectus for further information.

Past Performance

The performance information shown below assumes that all distributions made by the Fund in periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

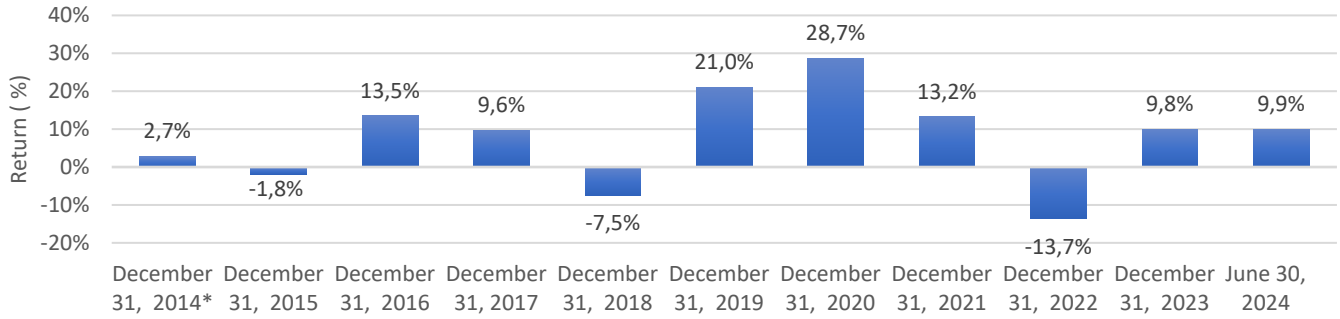

Year-by-Year Returns

The following bar charts show the Fund's annual performance for each of the years or the periods shown, and illustrate how the Fund's performance changed from year to year or period to period. Expressed as a percentage, these results show how much an investment's performance has increased or decreased between the first and last day of each year or period.

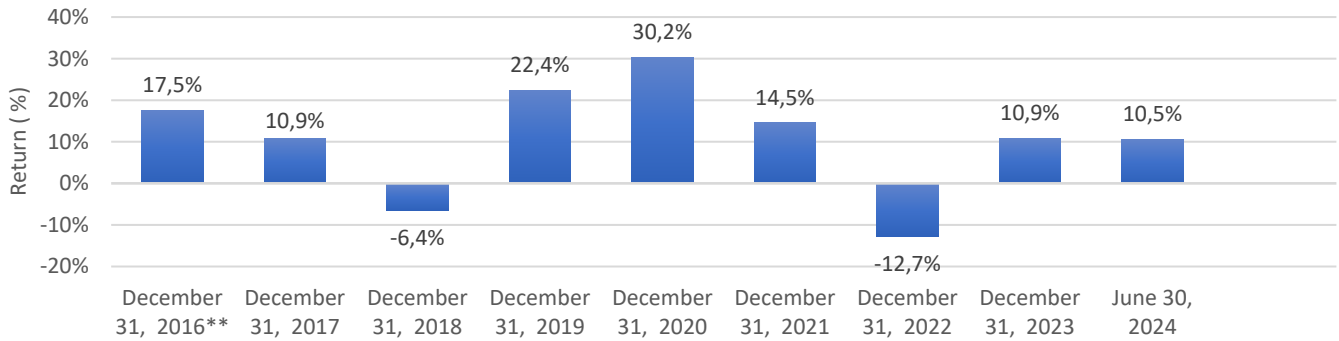

* Returns for the period from February 21, 2014, to December 31, 2014.
